PROGRAMMABLE LOGIC CONTROLLERS (PLC) TECHNICIAN PROGRAM (DISTANCE EDUCATION) (T903)

PROGRAM NAME	**Programmable Logic Controllers (PLC) Technician**
COURSE CODE	**T903**
SCHOOL	**School of Mechanical and Engineering Technologies**
CENTRE	**Construction Engineering Technology**
LOCATION	**Distance Education**
DURATION	**32 weeks (approximately)**
STARTING MONTH	**Open enrolment**
CREDENTIAL	**George Brown College Certificate**
YEAR OF STUDY	**2017-2018**
METHOD OF STUDY	**Distance**
APPLY TO	**Call 416-415-4726 or see www.plctechnician.com.**

TUITION

$1,700.00 *

ADDITIONAL COST

$70 per module, plus $370 for the DVD (which includes all software and required materials). International applicants are charged the same fees but in U.S. dollars (US$70 plus US$370); the posted exchange rate in effect at the time of your registration will be used to determine the final fee in Canadian dollars. There is no refund on DVD course materials for this program.

* Amounts listed are the total of tuition for programs starting in fall 2016. Fees are subject to change for programs starting in fall 2017 and at later dates.

The Programmable Logic Controllers (PLC) Technician program addresses the needs of employers who require a highly skilled technical workforce and those of students who need cost-effective, high-quality, fully accredited technical training.

Complete all aspects of the program while studying at home using an interactive learning package and receive a **PLC Technician certificate.** This innovative Distance Education program combines state-of-the-art PLC simulation with one of the biggest-selling PLC books in history.

The learning materials consist of a DVD with 19 courses (modules) containing text, audio, 2D and 3D animations, computer-based testing and PLC simulation software.

The interactive PLC simulation software essentially converts your computer into a virtual PLC and allows you to run, verify and debug ladder logic programs based on the Allen-Bradley RSLogix 500 format. The simulation software allows you to familiarize yourself with many different features associated with Allen-Bradley PLCs, including timers, counters, sequencers and math functions. Design ladder logic programs, perform tests and simulate the operation of real-world components, including motors, solenoid valves and a wide variety of other discrete and analog I/O devices.

You may enrol at any time during the year (open-enrolment) and complete the modules in the learning package at your own speed. Typical completion time is 32 weeks, but there are no time limits.

PREREQUISITES

Ontario Secondary School Diploma (with credits at or above general level) or equivalent or mature student status.

REQUIRED COURSES

The modules should be taken in the following order.

COMPULSORY (19)

Code	Course Name
ELNC 9071	Overview of PLCs
ELNC 9072	Central Processing Unit
ELNC 9073	I/O System
ELNC 9074	Programming Terminals and Peripherals
ELNC 9075	Installation and Maintenance of PLCs
ELNC 9076	Relay Logic
ELNC 9077	Ladder Logic
ELNC 9078	Timers
ELNC 9079	Counters
ELNC 9080	MCR, JUMP and FORCE Instructions
ELNC 9081	Sequencers
ELNC 9082	Data Transfer
ELNC 9083	Math Functions
ELNC 9084	Process Control
ELNC 9085	Data Communications
ELNC 9086	Number Systems and Codes
ELNC 9087	Digital Logic
ELNC 9120	RTUs and PACs
ELNC 9116	Introduction to Automation

YOUR CAREER

This program prepares you to work in the rapidly expanding field of industrial automation and control. Automation in industry is providing jobs for technically trained people who can build, program, integrate, service, maintain and operate PLCs. The PLC Technician program will provide the basic technical skills and knowledge necessary to work with electrical control systems typically found in an industrial environment.

PLC technicians install and repair industrial electronic equipment, including I/O networks, data highways, variable speed drives and process control equipment, and write PLC programs for a wide variety of automated control systems, ranging from simple on-off control systems to robotics. PLC technicians also find employment in the industrial engineering field, where they are actively involved in the design and implementation of PLC control systems.

ADMISSION REQUIREMENTS

Applicants are selected on the basis of their academic achievement, including the required courses, and any other selection criteria outlined below.

- Ontario Secondary School Diploma or equivalent**
- Grade 12 English (C or U)
- Grade 11 Math (M or U) or Grade 12 (C or U)

** Mature Student status (19 years of age or older)

SPECIAL REQUIREMENTS

- Pentium-based PC or equivalent
- DVD drive and sound card
- Minimum 32MB RAM (64MB recommended)
- Minimum 100MB available hard disk space
- Windows XP/ME/Vista/7/8/8.1/10
- Email account
- Internet access
- 16, 32 and 64 bit compatible
