Lesson 18:

Report Management System (RMS)

IGSS

Interactive Graphical
SCADA System

YouTube
Broadcast Yourself™

Contents of this lesson

Topics:

- **Design and run customized reports**
- **RMS fully embedded in Excel**
- **Create user defined reports**
  (LOG, BCL and HDM values as data source)
- **Create event-based reports**
  (e.g, batch reports)

Starting RMS

1. Open the IGSS 7.0 Start menu.
2. Double-click the **IGSS ODBC Server** icon.
   (The ODBC Server must be running, while you use RMS)
3. Double-click the **RMS Report Management System** icon.

The RMS Control Panel

1. Allows users to :

   - Run IGSS standard reports (Data to Excel)
   - Run RMS reports
   - Design RMS reports

2. I’ve created an RMS template for demo purposes.
3. Click **Edit RMS Template**.
4. Find the template **RMS_Final_Template.xls** and double-click to open it in Excel.

Daily report – LOG values

Present the report

1. Preview the report to see the end result.
2. Explain what you see in the report.
3. Close the preview.
4. Explain that all report cells are references to the **Data Definitions** sheet.

Design the report

1. Go to the the **Data Definitions** sheet.
2. Show the data definition for q1 – Average (comment).
3. Remove the data definition.
4. Create a new data definition for q1 – Average.
5. Explain that the zeros are just placeholders.

Event-based report (explain)

1. Go to the **Event-Based Report** tab.
2. Click **Options** and **Select sheets to output**.
   Remove the LOG sheet and select the Event-Based Report sheet.
3. Preview the report.
4. Explain the content of the report.
5. Close the preview.

Create the event

1. Click the **Event list** page.
2. Double-click the **Coffee Production** event.
3. Explain how it was set up.
4. Return to the **Data Definitions** sheet.

Event-based report (design)

1. Explain that all values are cell references to **Data Definitions**.
2. Remove the **Event no.** RMS tag.
3. Insert a new RMS tag with **Add Other Information**.

RMS command line interface

- Allows you to execute RMS reports from the Job Scheduler or
- Directly from a command prompt or
- By running a .bat file

Try it yourself ...
