Safe Commands and IGSS Audit Trail

INSIGHT AND OVERVIEW

Safe Commands - Supervise

Before IGSS 8

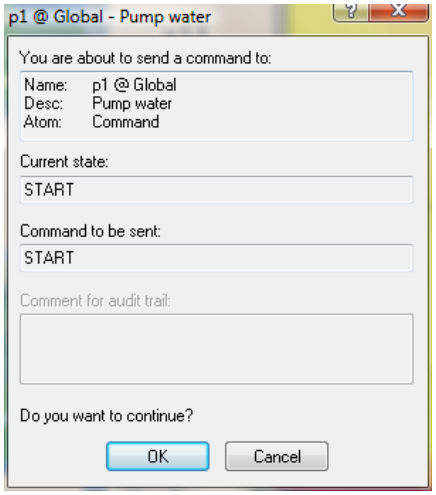

Command was executed immediately.

After IGSS 8

Command can be set up to be a safe command.

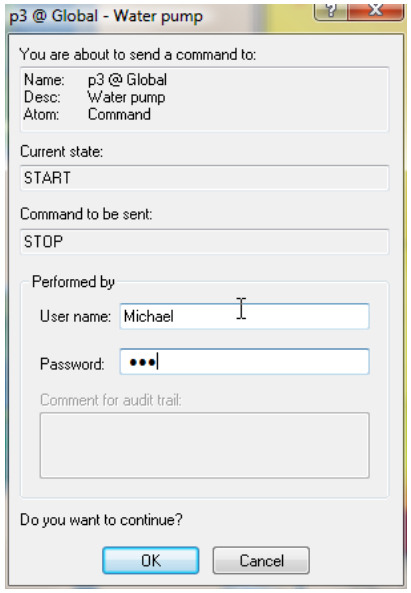

Three types of safe commands

Confirm

User must confirm by clicking OK.

Confirm password

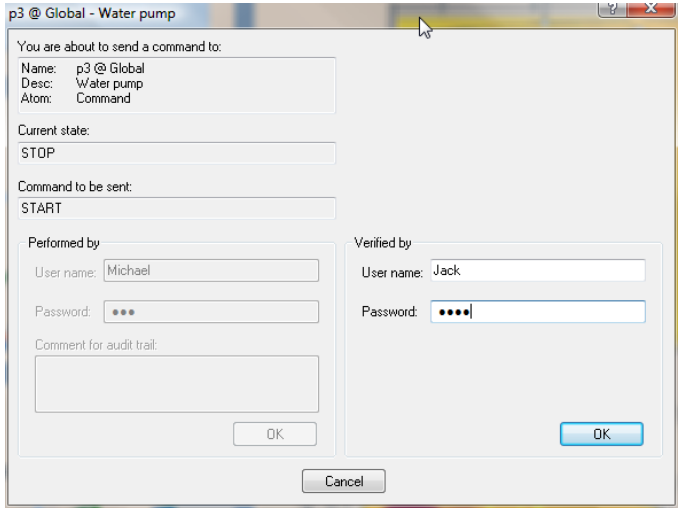

User must with user name and password.

NOTE:
Confirm password and **Confirm 2 users** only make sense, if you have user administration enabled.

Objects can be protected both with Protect and Safe Commands.

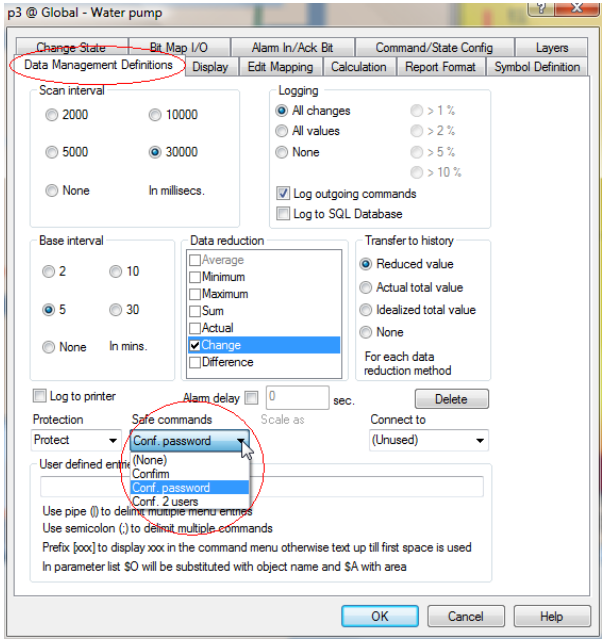

Confirm 2 Users

Two users must confirm with their user names and passwords.

Safe Commands in Definition

Can be set on the individual object …

… or using Property Table View
